

Treasury Data:

Infoscan can provide you with independent customised treasury information, which meets all the IAS39 requirements.

- > We create customised files that can be directly imported into your treasury system.
- > We take care of all the maintenance with receiving the data and deliver it to you as and when you require it.
- > Following are some of the available asset classes - BKBM, Zero Yield Curve, Australian & NZ Money Market, All Major Foreign Exchange Spot, Cross & Forward rates, Commodities, Futures.

End of Day Data (InfoBase):

InfoBase provides End of Day data for those with charting packages such as Ezy Charts & Metastock, or other technical analysis packages.

- > All global equities and futures exchanges are available.
- > Fully automated download software included, to update the market data to your hard drive and charting application.

Infoscan is a specialist New Zealand owned and operated company that designs and creates its own financial market services. All of these services can be customised to meet the individual requirements of our varied customers. Most of our services are updated in real-time to ensure that our customers are kept fully informed of pricing levels in today's volatile financial markets. We look forward to you becoming one of our customers.

For your **free trial** of our services & further information, please contact our team.

Market
Services*

www.infoscan.co.nz

Infoscan has been providing quality financial market services to a variety of customers, ranging from multinational corporates to individual investors, for over 20 years. We deliver these services internationally via the Internet and mobile devices, or directly into treasury software and technical analysis packages such as Excel, Ezy Charts and Metastock.

The financial information powering our services is sourced from a number of leading contributors including Thomson Reuters, to ensure the highest quality & integrity of this information. We deliver our information in real-time, delayed or on an end of day basis, customised to meet your requirements.

We can provide you with the ability to trade on the foreign exchange rates we publish through an easy to use dealing platform.

Why you need Infoscan

In today's volatile climate it is critical to understand where the markets are to make informed decisions & ultimately save you and/or your organisation time and money. Infoscan provides the information and trading tools you need to;

- > Be better informed in your negotiations with your bank and broker.
- > Make accurate costing & pricing decisions.
- > Prevent unnecessary losses while capitalising on profits.
- > Gain timely access to unbiased quality data.
- > Improve your financial risk management.
